Interest from these held-to-maturity investments after acquisition date is recognized in the profit or loss based on the interest income to be received. Interests arising prior to the Group's acquisition of held-to-maturity investments are recorded as a decrease in the costs as at the acquisition time.

When there are reliable evidences proving that a part or the whole investment cannot be recovered, and the loss are reliably determined, the loss is recognized as financial expenses during the period while the investment value is derecognized.

#### ***Loans***

Loans are measured at costs less allowance for doubtful debts, which is made based on estimated losses.

#### ***Investments in joint ventures and associates***

##### ***Joint ventures***

A joint venture is an entity which is established by a contractual arrangement whereby the Group and the involved parties undertake an economic activity that is subject to joint control. Joint control is the contractually agreed sharing of control over an economic activity and exists only when the strategic financial and operating decisions relating to the activity require the unanimous consent of the parties sharing control (the ventures).

The Group recognizes its interests in jointly-controlled entities in accordance with the equity method. Accordingly, contributed capital in joint ventures is initially recognized at original cost and then adjusted for the changes in the Group's ownership rate of net assets of jointly-controlled entities. The consolidated Income Statement reflects the Group's ownership in the financial performance of jointly-controlled entities. The Group stops using the equity method from the date it ceases to have the jointly-controlled right or significant influences on jointly-controlled entities.

The Financial Statements of the jointly controlled entity are prepared for the fiscal period that is the same as the Consolidated Financial Statements of the Group. In the case that the accounting policy of a jointly controlled entity is different from the accounting policy applied consistently in the Group, the Financial Statements of that jointly controlled entity will be properly adjusted before being used for the preparation of the Consolidated Financial Statements.

Accordingly, the investment into associate is initially recorded at costs on the Consolidated Financial Statements and then adjusted for the post acquisition change in the Group's share of net assets of the associate. If the Group's share of loss of an associate exceeds or equals the carrying amount of an investment, the investment is then reported at nil (0) value on the Consolidated Financial Statements, except when the Group has obligations to pay on behalf of the associate to satisfy obligations of the associate.

The Financial Statements of the associate are prepared for the accounting period that is the same as the Consolidated Financial Statements of the Group. In the case that the accounting policy of an associate is different from the accounting policy applied consistently in the Group, the Financial Statements of that associate will be properly adjusted before being used for the preparation of the Consolidated Financial Statements.

Unrealized profits/(losses) arising from transactions with associates are eliminated in proportion to the amount under the Group's ownership in the preparation of the Consolidated Financial Statements.

#### *Investments in equity instruments of other entities*

Investments in equity instruments of other entities include such investments in equity instruments that the Group does not have the control, joint control or significant influence on these entities.

Dividends and profits of the periods prior to the purchase of investments are recorded as a decrease in value of such investments. Dividends and profit of the periods after the purchase of investments are recorded into the sales. Particularly, the dividends paid in the form of shares are not recorded as an increase in values, but the increasing quantity is followed up.

Provisions for investments in equity instruments of other entities are made as follows:

- For investments in listed shares or the reliably determined fair value of investments, provisions are made based on the market value of shares.
- For investments of which the fair value is unable to determine at the time of reporting, provisions are made based on the losses of the invested entities at the rate equal to the difference between the actual capital invested by parties and the actual owner's equity multiplying (x) by the Group's rate of capital contribution in comparison with the total actual capital invested by parties.
